

“ This is the one forum that I have attended that drives connectivity and collaboration amongst the attendees through the roundtable discussions and speed networking. ”

Rob Lewin, Director Global Logistics, **Flowserve**

“ Great event to get a pulse on the industry and network with industry colleagues. ”

Matt Donnerwirth, Global Logistics Lead, **Noble Energy**

## Value Proposal

Running each October in Houston, the *O&G Supply Chain Logistics Forum* brings Logistics and Supply Chain professionals together to learn from their peers in an immerse and interactive environment.

You will hear practical applications of technologies, analytics and enhanced processes to **improve efficiencies and reduce costs** in the current O&G environment. These can then be brought back to be implemented within your organization.

### Networking and learning Opportunities

This Forum is structured in a highly interactive way, with **speed networking, panel sessions, breakouts and networking breaks** throughout both days. Operators, OFS, equipment and materials, freight forwarders and solution providers will be given plenty of opportunity to share their best practices under one roof.
